"All I can say in the end is encore, encore, encore."

Inner Guidance System

Let's connect to it.

Inner Atlas is an enchanting set of tools, instructions, and support that empowers children – together with the adults in their lives – to develop their Inner Guidance Systems and navigate life's terrain.

Inner Guidance System

Your own inner knowing built through your experiences, emotions, imagination, intuition, and senses, that helps you navigate and thrive in the outer world.

"The life lessons Mullaly concentrates on in her books are the foundation of an upstanding human."

Today's Challenges

A crisis for all ages.

Kids and families today find themselves trapped in a world where they don't have the tools to handle challenges like mental well-being, anxiety, sadness, losing touch with their authentic selves, just to name a few.

They are stuck in a place where the external world is defining their internal well-being and identity.

They are disconnected from their own Inner Guidance Systems. They are without internal waypoints and resources to help them create a new outer perspective and navigate this external, challenging world.

As the founder of Inner Atlas, I've met and spoken with thousands of kids and families who are facing these exact issues.

- In fact, **1 in 5 young people** is affected by mental health challenges, such as anxiety and depression, and two-thirds of those who need treatment do not have access to it.
- Add on to that, **31% of parents** say they are facing their own mental health issues: anxiety, depression, a lack of sense of self.
- And short of therapy, they don't know where to turn for their own well-being.

"Think of these books as a lifesaver of sorts."

Today's Challenges We all face them.

Parents and other adults who care about and work with children face some big obstacles in these challenging times. They themselves are disconnected from their own Inner Guidance System. This can leave them ill-equipped to help guide their own kids. They don't know where to go to find truly useful and engaging resources for their children, along with the whole family.

Consumers are looking for products – books, media, toys, games – that can improve their children's mental well-being, that engages the whole family, and helps them all navigate life's challenging terrain.

Media companies are looking for ways to explore issues of mental health while still being entertaining. They are seeking something new and unique that truly stands out in a saturated market, that can bridge ages and demographics.

Toy and game companies are wanting to create toys and games that provide mental, emotional, and social health tools that consumers today are searching for. Tools that can also engage the whole family, and provide truly useful ways to help navigate this external, challenging world.

Publishers want to meet the mental health needs of their young readers but don't always have the evergreen, enchanting content and tools that will attract buyers and keep the whole family engaged.

"A modern-day Dr. Seuss with a contemporary twist
and an important message for kids."

There is a
Solution
Imagine the
possibilities.

WHAT IF kids could find their way in the world by going within? And, what if their capacity to do so is just waiting to be tapped?

WHAT IF there were enchanting tools and engaging resources that truly address these inner challenges and offer useful solutions that help the whole family change their outer experiences and perspectives?

WHAT IF adults could access a full suite of inner guidance resources that equip them as guides for children's empowerment in this complex world?

WHAT IF there were new ANIMATED adventures that took viewers on journeys of mental well-being, that were truly empowering, and stood out from the rest?

WHAT IF there were enchanting TOYS and GAMES that could help meet the mental, emotional, and social well-being of consumers of all ages?

WHAT IF there were fully-developed BOOKS and resources that could meet the mental health needs of readers of all ages? Books that truly stand out.

"The *Inner Atlas* series is nothing short of spectacular."

Our Characters

What truly sets us apart.

Introducing what truly sets us apart – our characters!

The characters you encounter in each Land are what truly make us unique.

These enchanting and original characters provide an extra pathway to connect to the lessons and bring the stories to life.

Think back on your favorite characters as a kid and your connection to them. We have the next timeless and memorable set of characters, just waiting to be shared with the world. As kids engage with these characters, they begin to use the tools and skills as they go out into the world.

These timeless characters become trusted reminders and guides.

As the kids grow, these enchanting and endearing characters grow with them, staying by their side for years to come.

Plus, these characters are easy to adapt to a variety of platforms, enabling them to engage with the kids in a multitude of ways and outlets, especially toys and animation.

“Eye-opening, imaginative, and deeply touching.”
